

(問題)

$$\left(\frac{1}{6} + \square\right) \div 0.75 = 9$$

$$\underline{\left(\frac{1}{6} + \square\right) \div 0.75 = 9}$$

$$\begin{aligned}\underline{\frac{1}{6} + \square} &= 9 \times 0.75 \\ &= 9 \times \frac{3}{4} \\ &= \frac{27}{4} \\ &= \underline{6\frac{3}{4}}\end{aligned}$$

覚える。  
0.75 =  $\frac{3}{4}$  だよ。

↓

$$\frac{1}{6} + \square = 6\frac{3}{4}$$

$$\begin{aligned}\square &= 6\frac{3}{4} - 1\frac{5}{6} \\ &= 6\frac{9}{12} - 1\frac{10}{12} \\ &= 5\frac{21}{12} - 1\frac{10}{12} \\ &= 4\frac{11}{12}\end{aligned}$$

$$\boxed{4\frac{11}{12}}$$
