4月第2回（4/6〜4/9）

(1)　2.3km² = $\boxed{}$ m²

(2)　$\dfrac{4}{15} \div \dfrac{2}{\boxed{}} + \dfrac{7}{10} \times 5 = 3\dfrac{9}{10}$

(3)　$\left(1.9 - \dfrac{4}{5}\right) \div \dfrac{11}{20} - \left(\dfrac{5}{8} \times 2.4 - 0.5\right)$

1

(1)　2.3 km² = □ m²

$1\ km^2 = 1\ km \times 1\ km$

$= 1000m \times 1000m$

$= 1000000\ m^2$

↓

$\underline{2.3\ km^2} = 2.3 \times 1000000\ m^2$

$= \underline{2300000\ m^2}$

$\boxed{2300000}$

(2)

$\underset{\underset{\text{～}}{}}{\dfrac{4}{15} \div \dfrac{2}{□}} + \underset{\text{～}}{\dfrac{7}{10} \times 5} = \underset{\text{～}}{3\dfrac{9}{10}}$

↓

$\dfrac{7}{10} \times 5 = \dfrac{7}{2} = 3\dfrac{1}{2}$

$\boxed{} = 3\dfrac{9}{10} - 3\dfrac{1}{2}$

$= 3\dfrac{9}{10} - 3\dfrac{5}{10}$

$= \dfrac{4}{10}$

$= \dfrac{2}{5}$

$\dfrac{4}{15} \div \dfrac{2}{□} = \dfrac{2}{5}$

$△ = \dfrac{4}{15} \div \dfrac{2}{5}$

$= \dfrac{4}{15} \times \dfrac{5}{2}$

$= \dfrac{2}{3}$

$\dfrac{2}{□} = \dfrac{2}{3}$　より　□ = 3

$\boxed{3}$

(3)

$(1.9 - \dfrac{4}{5}) \div \dfrac{11}{20} - (\dfrac{5}{8} \times 2.4 - 0.5)$

①　②　③　④

⑤

①は分数で計算してもよい。

$1.9 = \dfrac{19}{10}$

① -- $\dfrac{4}{5} = 4 \div 5 = 0.8$ より

$1.9 - 0.8 = 1.1 = \dfrac{11}{10}$

② -- $\dfrac{11}{10} \div \dfrac{11}{20} = \dfrac{11}{10} \times \dfrac{20}{11} = 2$

③ -- $\dfrac{5}{8} \times 2.4 = \dfrac{5}{8} \times \dfrac{24}{10} = \dfrac{3}{2} = 1.5$

④ -- $1.5 - 0.5 = 1$

⑤ -- $2 - 1 = 1$

$\boxed{1}$
