

4月第5回(4/17~4/19)

(1) $0.26\text{ha} + 5110\text{m}^2 = \square \text{a}$

(2) $\frac{9}{16} \times \frac{\square}{6} \times \frac{8}{15} = \frac{1}{4}$

(3) $\left\{ \left(1\frac{3}{4} - 1\frac{2}{3} \right) \times \square + \frac{1}{5} \right\} + 3 = 1\frac{2}{5}$

4月第5回(4/17~4/19)

(1) $0.26ha + 5/10m^2 = \square a$

1ha = 100a より,

$0.26ha = 100 \times 0.26 = 26a$

$10m \times 10m = 1a$

↓

$100m^2 = 1a$ より,

$5/10 \div 100 = 5/100$

↓

$5/10m^2 = 5/100a$

$26 + 5/100 = 26.05a$

26.05

(2) $\left\{ \left(\frac{3}{4} - \frac{2}{3} \right) \times \square + \frac{1}{5} \right\} \div 3 = 1\frac{2}{5}$

7式 $\left(\frac{1}{12} \times \square + \frac{1}{5} \right) \div 3 = \frac{7}{5}$

$(\quad) = \frac{7}{5} \times 3$

$(\quad) = \frac{21}{5}$

$\frac{1}{12} \times \square + \frac{1}{5} = \frac{21}{5}$

↓

$\frac{1}{12} \times \square = \frac{21}{5} - \frac{1}{5}$

$\frac{1}{12} \times \square = 4$

$\square = 4 \div \frac{1}{12}$

$= 48$

48

(2)

$\frac{9}{16} \times \square \times \frac{8}{15} = \frac{1}{4}$

逆算する。

$\square = \frac{1}{4} \div \frac{8}{15} \div \frac{9}{16}$

$= \frac{1}{4} \times \frac{15}{8} \times \frac{16}{9}$

$= \frac{5}{6}$

$\square = \frac{5}{6}$

分母が同じだから

$\square = 5$

5
